

Lots of the early information you may have seen or heard, or simply know, however as it moves on it contains facts about how 911 and so many other times in history have been staged to come to the point where we are today to put chips in new passports and even under peoples skin to track them and maintain total control of them. While this is a long almost two hour film it warrants watching. If you wish you can move through it by using the controls, but check it out for yourself. Keep in mind fear is the major factor being used to hoodwink the minds of the masses. Iraq, Afghanistan, and Chavez were planned marked targets. They failed in dealing with the last target Chavez, however the plan by the Federal Reserve (1913) that took control of the European world east and west banking systems is still calling all the shots. This is why Chavez now moves hard the way he does and they are attacking his character. Beware of the Mark of the beast ya'll, it is closer in taking away all so called civil liberties we thought we had and we may think.
